# CODICI/COLORI CODES/COLORS

Per determinare il codice del prodotto,  
sostituire **(X)** con la lettera corrispondente al colore.

In order to define the product code,  
replace **(X)** with the letter which corresponds to the colour.

Pour déterminer le code du produit,  
remplacer **(X)** avec la lettre qui correspond à la couleur.

Zur Bestimmung des Produktcodes ersetzen Sie **(X)**  
durch den Buchstaben, der für die entsprechende Farbe steht.

# PLUS

## PELLET

# Tubi in acciaio normale 2mm verniciato

in nero opaco e grigio

Matt black and grey painted  
2 mm pipes

Tubes 2 mm laqués  
noir mat et gris

2-mm- Rohre, grau und  
mattschwarz lackiert

**Senotherm**<sup>®</sup>  
marchio registrato Weilburger Coatings GmbH

Di gradevolissimo aspetto estetico, sono costruiti con lamiera di acciaio di spessore 2mm ed esternamente rivestiti con SENOTHERM<sup>®</sup>, una speciale vernice per alte temperature che resiste fino a 500°C.

**IMPORTANTE:** la *condensa* è un fenomeno abbastanza frequente sia per il tipo di stufe su cui si installano (con fumi a basse temperature), sia per l'inerzia termica dei tubi stessi dovuta al loro elevato spessore. Questi canali da fumo sono classificati W, quindi possono essere installati anche in presenza di condensa purchè vengano montati con l'imbocco rivolto verso il basso (vedi disegno). Per fare questo può essere necessario usare come partenza il raccordo anticondensa oppure l'inserto anticondensa.

Nel sito [www.savefumisteria.it](http://www.savefumisteria.it) sono disponibili le Dichiarazioni di Conformità con tutti i riferimenti ai test eseguiti e le istruzioni di montaggio e manutenzione a garanzia di assoluta sicurezza nell'utilizzo

Tutti i prodotti sono muniti di codice a barre Sistema EAN 13, il codice a barre viene riportato anche sulla confezione.

Pleasing to the eye, these pipes are made of sheet steel 2 mm thick and are coated on the outside with SENOTHERM<sup>®</sup>, a special coating for high temperatures that resists up to 500°C.

**IMPORTANT:** *condensate* is quite a common occurrence due both to the type of stove on which they are installed (with low temperature smoke) and for the thermal inertia of the pipes themselves caused by their considerable thickness. These flue pipes are classified as W, and, consequently, they can be installed even in the presence of condensate as long as they are fitted with the inlet facing downwards (see drawing). To do this, it may be necessary to use an anti-condensate fitting or an anti-condensate insert to start with.

The [www.savefumisteria.it](http://www.savefumisteria.it) website provides Declarations of Conformity with reference to all the tests performed and Installation and Maintenance Instructions to ensure the greatest safety during use.

All the products are marked with an EAN 13 System bar code. The bar code is also printed on the packaging.

## TUBI 2 mm

VERNICIATI in nero opaco e grigio

- Matt black and grey painted 2 mm pipes
- Tubes 2 mm laqués noir mat et gris
- 2-mm-Rohre, grau und mattschwarz lackiert
